

D6 Pro WiFi Ductless Controller

It's ductless control, simplified.

SIMPLE goes with everything.

The D6 Pro WiFi Ductless Controller is the thermostat-like control that helps your customers get more out of their ductless systems – and a great add-on that helps you reduce callbacks.

The Honeywell Home D6 Pro WiFi Ductless Controller improves virtually every ductless system you install.

One of the big advantages of ductless mini-split systems is their simplicity. Minimal hardware. Easy installation. Simple – except for the button-loaded remote control that nobody understands.

The D6 Pro Controller keeps ductless simple. Installation and on-device setup take only a few minutes. The Honeywell Home mobile app adds features like scheduling, geofencing, and multi-zone control. Even homeowner hand-off is simple. The app will send a personalized email that invites the customer to complete the WiFi connection process on their own. That's about as simple as ductless control gets.

The Honeywell Home D6 Pro WiFi Ductless Controller. **Simply in control.**

Simply compatible

The D6 Pro Controller is compatible with more than 100 different models of ductless mini-split systems from the top manufacturers.

Simple control

Replace complicated remotes with the straightforward design of the D6 Pro Controller. It looks and works like a thermostat.

Simple interface

-  WiFi status icon
- AUTO** AUTO mode icon
-  Temperature display
-  Mode change button
- +** Temperature change buttons

Honeywell Home D6 PRO WiFi DUCTLESS CONTROLLER

The simple way to solve ductless system headaches.

Quick, easy installation

Install the D6 Pro Controller on the wall or on a table. Installer setup is done right on the device without an app. Just set six parameters, including brand and model of the ductless system. Homeowner hand-off is a snap: The Honeywell Home app sends an email to the customer, inviting them to complete the WiFi connection process on their own.

Accurate temperature

Eliminate customer confusion around temperature set points. Instead of sensing temperature at the head unit, the D6 Pro Controller senses temperature at the device — making it easy for customers to get the temperature they want.

Powerful mobile app

A big part of the D6 Pro Controller experience comes from the Honeywell Home mobile app. Customers can set mode, temperature, and fan speed, setup scheduling and geofencing, get alerts, and manage multi-zone systems right from their smartphone or tablet. Plus, the app works with Amazon Alexa-enabled devices (like the Amazon Echo), or the Google Home smart speaker.

More sales, fewer callbacks

The D6 Pro Controller is a must-have addition to every new ductless system, and an affordable service upsell for existing systems. Intuitive controls, auto changeover, and mode troubleshooting from the app all add up to fewer callbacks and truck rolls.

And the D6 Pro Controller is part of the same Honeywell Home connected platform that includes thermostats, security cameras and water leak/freeze detectors—which helps you sell it as part of a whole home solution.

Part number	Dimensions	Warranty
DC6000WF1001/U	3.5" x 3.5" x 0.62" without desktop stand	5 years
